Óbuda University John von Neumann Faculty of Informatics	Institute of Software Engineering

Name and code: Software design and Development II. (Exam) (NIXSF2EBNE) **Credits:** 6

Computer Science BSc *Daytime 2019/20 year II. semester*

Subject lecturers: Dr. László Csink				
Prerequisites: (with code)	Software design and development I (NIXSF1EBNE)			
Weekly hours:	Lecture: 0	Seminar: 0	Lab. hours: 0	Consultation: 0
Way of assessment:	Examination			

Course description

Goal: Based on SWDD I, the goal is to deepen theoretical and practical knowledge in software design and development.

Course description: Programming paradigms. Inheritance. Method hiding. Polymorphism. Abstract classes and interfaces. Iterators. Components. Operator overloading. Exceptions. Generic classes. Advanced sorting. Dynamic arrays. Lists. Queue and stack. Binary search tree. Red and black tree. B-tree. Heaps. Directed and undirected graphs. Trees. Spanning trees. Kruskal and Prim algorithm. Connected components. Search for a path in the graph. Hashing. Maximal flow.

Midterm Test Scheduling

Education week	Topic

Midterm grade calculation methods

Method of replacement

Type of exam

Written exam, only for those who have the signature (both midterm tests better than 50 %, possibly by retake, and successful home project, and attendance).

Exam grade calculation methods

Achieved result	Grade
89-100%	excellent (5)
76-88%	good (4)
63-75%	average (3)
51-62%	satisfactory (2)
0-50%	failed (1)
