Frontend Developer (Angular) Entry-Level Opportunity

Position: Frontend Developer
Location: Intelligent Vision Kft.
Type: Part-Time/Full-Time
Start Date: 2025.01.01.

We are seeking a motivated and detail-oriented Frontend Developer with expertise in Angular and a solid understanding of cloud and web technologies. This position is ideal for Master's students or recent graduates looking to grow their skills in a collaborative, fast-paced environment.

Key Responsibilities:

- Develop and maintain responsive web applications using Angular frameworks.
- Visualize sport analytical data.
- Collaborate with backend developers, designers, and product managers.
- Integrate frontend components with cloud-based services and APIs.
- Participate in code reviews, testing, and debugging.

Required Skills and Qualifications:

- Enrolled in or recently graduated from a Master's program in Computer Science, Software Engineering, or a related field.
- Strong knowledge of Angular.
- Familiarity with TypeScript, HTML5, CSS3, and responsive design principles.
- Understanding of RESTful APIs and integration techniques.
- Experience with version control systems (e.g., Git).
- Strong analytical and problem-solving skills.
- Excellent communication and teamwork abilities.
- Experience with AWS is a plus.
